November 2, 2021

Richard Beattie, Director  
Procurement and Contracts

Dear Mr. Beattie:

The high-level project plan for the Department of Health and Environment and Department for Aging and Disability Services Electronic Visit Verification Services project is enclosed. Jeffrey Miller is the primary contact for the project and can be reached at (816) 522-5060. This letter constitutes approval of the project pursuant to K.S.A. 75-7209.

K.S.A. 75-7209 states all specifications for any competitive acquisition related to an approved information technology project shall be reviewed by the chief information technology officer for the branch of state government of which the agency or agencies are a part. The requirement that agencies obtain CITO approval of proposed IT projects has been adjusted to be in agreement with JCIT suggestions. As a result, all specifications for any competitive acquisition related to an approved IT project shall now be approved by the CITO before release.

If a variance of 10% or more in time or cost to the approved high-level project plan would occur with vendor selection, a revised high-level project plan must be submitted for CITO approval and the CITO's approval shall be received, prior to contract award. The CITO will notify JCIT of such events as per their request.

Once the final contracts are awarded, the high-level project plan will need to be updated with detailed information and receive final CITO approval. As required by statute and reinforced by the JCIT, the detailed project plan must receive CITO approval prior to project execution. This detailed project plan should include information found at the following link: <https://ebit.ks.gov/kito/epmo/proposed-information-technology-project-plans>.

As of July 1, 2013, new CITO-reportable projects are assessed a fee to support KITO operations. The fee will be assessed against the total project cost identified in the agency's detailed project plan. The fee will be billed quarterly until the project's Post Implementation Evaluation Report (PIER) is received. Fees will be based on the following rate structure:

- Projects valued between \$250,000 and \$1,000,000 - .004 of the Project cost
- Projects valued between \$1,000,001 and \$5,000,000 - .003 of the Project cost
- Projects valued between \$5,000,001 and \$10,000,000 - .002 of the Project cost
- Projects valued greater than \$10,000,001 - .0004 of the Project cost
- Infrastructure projects - .0003 of the Project cost

Dr. DeAngela Burns-Wallace  
Secretary- Kansas Department of Administration  
Executive Branch Chief Information Technology Officer  
Curtis State Office Building  
1000 SW Jackson St, Suite 500  
Topeka, KS 66612

Dear Dr. Burns-Wallace,

The Kansas Department of Health and Environment (KDHE), in conjunction with the Kansas Department for Aging and Disability Services (KDADS), desires to implement Home Health Care Services (HHCS) and Personal Care Services (PCS) functionality in a shared Electronic Visit Verification (EVV) software solution. This will be a replacement for the EVV solution currently in place with First Data Government Solutions, LLC known as Authenticare. The existing contract for Authenticare services is scheduled to expire at calendar year-end 2022.

This project will accomplish the following objectives: (a) compliance with the requirements as found in the 21st Century Cures Act of 2016, (b) reduce or eliminate fraudulent care claims and (c) enhance the efficiency and effectiveness of the State of Kansas by reducing costs and improving system usability.

At this time, we are submitting a formal request for High-Level approval with the following supporting documentation as outlined by the Kansas Information Technology Office.

- A cover letter signed by the state entity head requesting approval of the high-level project plan,
- State Entity Checklist for High-Level IT Project Plan 1.2
- DA519 Information Technology Request Explanation,
- DA519 Information Technology Cost-Benefit Statement
- Work Breakdown Structure (WBS) with major milestones,
- Risk Identification Summary,
- Architectural Compliance statement,
- Ownership of Software Code and Related Intellectual Property Statement
- Accessibility Statement and approval letter from the State Director of IT Accessibility
- Electronic Record Retention Statement and approval letter from the State Archivist
- Risk Assessment Analysis (RAM)

## *1.0 Executive Project Approval Request*

Project Description and Justification:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Date Submitted:    | 9/17/2021 |
| <p>KDHE-DHCF, in conjunction with partner agency Kansas Department for Aging and Disability Services (KDADS), desires to implement Personal Care Services (PCS) and Home Health Care Services (HHCS) functionality in the Electronic Visit Verification (EVV) software solution to accomplish the following objectives: (a) comply with the requirements as found in the 21st Century Cures Act of 2016, (b) reduce or eliminate fraudulent care claims and (c) enhance the efficiency and effectiveness of the State of Kansas by reducing costs and improving system usability.</p> <p>There are 6 (six) specific expectations of the EVV Solution data capture:</p> <ol style="list-style-type: none"> <li>1) the type of service performed</li> <li>2) the individual receiving the service</li> <li>3) the date of the service</li> <li>4) the location of service delivery</li> <li>5) the individual providing the service</li> <li>6) the time the service begins and ends</li> </ol> <p><b>Solution Description</b></p> <p>The solution is expected to be a highly secure Cloud-Based SAAS application offering an open approach to EVV whereby the Providers can either choose to use the EVV application provided by the State of Kansas or their EVV tools which must meet state standards. When Providers choose to utilize their EVV tools, the EVV data must meet state-mandated data requirements and be uploaded to the aggregator portal for integration with data collected by the State of Kansas EVV application. Business process changes are as critical to the project as infrastructure and applications. Caregivers will be expected to log into an EVV application to 1) validate that they have arrived, 2) document which services were administered, and 3) confirm when the care for each service concluded and when they left.</p> <p><b>Business Outcomes</b></p> <ul style="list-style-type: none"> <li>• The State Medicaid Agency has enhanced ability to prevent fraud, waste, and abuse through increased visibility into its Home Health Care Services (HHCS) programs</li> <li>• The EVV solution is reliable, accessible, and minimally burdensome on providers, beneficiaries, and their caregivers</li> </ul> <p><b>Enterprise Outcome</b></p> <ul style="list-style-type: none"> <li>• Appropriate safeguards of electronic protected health information and personally identifiable information are implemented and maintained</li> </ul> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                    |           |

| List any collaboration that has taken place in the planning of the IT Project, and/or will take place during the execution of the project. Include tools, methods, and best practices used for providing collaboration, user input, and continued social networking.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                    |           |
| <p>The State of Kansas EVV Project Team is working across departments (KDADS, KDHE, and OITS) to build a coordinated application serving both PCS and HHCS. The team is collaborating with other states through a national EVV Networking Group comprised of state EVV Project leaders. The project requirements will involve work with the EVV Vendor, Gainwell Technologies, Provider EVV vendors, and the MCOs. Comprehensive communication and change management plan will help facilitate the design, build, testing, and implementation of integrations and business processes across a wide range of Key Stakeholders.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                    |           |

| <b>5. Qualitative and Quantitative Savings Explanation</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |       |                                            |                 |                 |                               |                 |                 |
| Implementing an Electronic Visit Verification (EVV) solution has an impact in two ways.                                                                                                                                                                                                                                                                                                                                                                                                                                                   |       |                                            |                 |                 |                               |                 |                 |
| First, EVV is a Federal mandate and the State of Kansas would get penalized as much as a 1% penalty on Home Health Care Services (HHCS) and Personal Care Services (PCS) reimbursements if an approved EVV solution is not implemented. Our savings model is using the full 1% penalty in the calculations.                                                                                                                                                                                                                               |       |                                            |                 |                 |                               |                 |                 |
| Second, EVV is a deterrent to Fraud and abuse. Caregivers must log into the EVV system and properly register their arrival and departure from a Member's home or place of service. Failure to do so, will result in a claim being held for proper evidence or dismissed outright. Results from other states that have implemented EVV are showing as much as a 15% reduction of claims against the same level of care being provided. Our savings model is only using a 1% reduction of claims due to the elimination of Fraud and Abuse. |       |                                            |                 |                 |                               |                 |                 |
| In addition, eliminating fraudulent claims also works to reduce the total claims processed and the associated costs of processing.                                                                                                                                                                                                                                                                                                                                                                                                        |       |                                            |                 |                 |                               |                 |                 |

Secretary Laura Howard  
Kansas Department for Aging and Disability Services  
New England Building  
503 South Kansas Ave  
Topeka 66603-3404

Dear Secretary Howard:

As part of the approval process for information technology projects over \$250,000, the State Archivist is required to evaluate the impact of such projects on government records with long-term (10+ year) retention requirements. If the project impacts long-term records, the State Archivist must ensure that appropriate provisions have been made for these records in the high-level and detailed project plans, in the system design, and for their ingestion, if prudent and feasible, into the Kansas Enterprise Electronic Preservation (KEEP) system. An Electronic Records Retention Statement (ERRS) and approval letter from the State Archivist must accompany high level and detailed project plans submitted to the Executive Branch Chief Information Technology Officer.

In compliance with this process Jeff Miller, Project Consultant, sent to me for review an ERRS for the Kansas Department for Aging and Disability Services' Electronic Visit Verification (EVV) High-Level project plan. KSHS staff has noted that relevant State Records Board-approved retention and disposition schedule entries will need to be updated and would recommend a review of work processes to ensure accuracy in the entries. Records management tasks have been added to the initial project plan.

The Electronic Records Retention Statement for the KDAD's EVV high-level project plan is approved. A copy of this letter should be included when submitting the project plan to the Executive Branch CITO for approval.

I want to thank you and your staff for your cooperation in the effort to meet the challenges of effectively managing and preserving Kansas government electronic records.

Sincerely

A handwritten signature in cursive script that reads "Megan Burton".

Topeka, KS 66612-1220

Laura Howard, Secretary  
Department for Aging and Disability Services  
503 S Kansas Ave., New England Building  
Topeka, KS 66603-3404

Dear Secretary Norman and Secretary Howard:

As part of the approval process for information technology projects over \$250,000, a statement indicating compliance with State Information Technology Executive Council (ITEC) Policy 1210 *Information and Communication Technology Accessibility Standards* must be filed with the Branch Chief Information Technology Officer and approved by the Director of Information Technology (IT) Accessibility. I recently received from Jeffrey Miller an Accessibility Statement for the Electronic Visit Verification Services project for review in compliance with this process.

This statement affirms that the project will comply with the requirements of ITEC Policy 1210, and a Voluntary Product Accessibility Template® (VPAT®) will be required from the selected vendor and will be included with the submission of the contracting document.

The Accessibility Statement for the Electronic Visit Verification Services high-level project plan is approved. A copy of this letter should be included with the submittal of the Electronic Visit Verification Services high-level project plan for Branch CITO approval.

Sincerely,

DocuSigned by:

## ***7. Architectural Statement***

### **Architectural Statement**

KDHE & KDADS follows ITEC Policies 4010 and 9500.

Architectural information for this proposed KDHE IT Modernization program follows the Kansas Information Technology Architecture version 12.0. In-house development and vendor-supplied technologies will be implemented in accordance with state architecture standards.

## ***8.0 Ownership of Software Code and Related Intellectual Property (ITEC Policy 1500)***

KDHE & KDADS follow ITEC Policy 1500.

Code generated during the project will be the sole property of the state. Accordingly, the project does not present any compliance issues.

## ***10. Accessibility Statement***

### **Accessibility Statement**

This proposed KDHE- KDADS Electronic Visit Verification program is an implementation of an Electronic Visit Verification application addressing all CMS requirements for Certification.

The project will follow ITEC policies governing accessibility. A Voluntary Product Accessibility Template version 2.3 will be required from the selected vendor and will be included with the submission of the contracting document. Any accessibility requirements within KDHE or KDADS today will not be affected by this project and will remain in their current state.

### **Electronic Record Retention Statement**

#### **Project Overview:**

The Kansas Department of Health and Environment, Division of Healthcare Finance (KDHE-DHCF) in conjunction with partner agency Kansas Department for Aging and Disability Services (KDADS), desires to implement Personal Care Services (PCS) and Home Health Care Services (HHCS) functionality in the Electronic Visit Verification (EVV) software solution to accomplish the following objectives: (a) comply with the requirements as found in the 21st Century Cures Act of 2016, (b) reduce or eliminate fraudulent care claims and (c) enhance the efficiency and effectiveness of the State of Kansas by reducing costs and improving system usability.

The following are the 6 (six) federally mandated data elements to be captured by the EVV Solution:

1. Type of service performed.
2. The individual receiving the service.
3. Date of service.
4. Location of service delivery.
5. The individual providing the service.
6. Timestamp of when the service begins and ends.

#### **Solution Description:**

- The solution is expected to be a highly secure Cloud-Based SAAS application offering an open approach to EVV whereby the Providers can either choose to a) use the EVV application provided by the State of Kansas or b) use their own EVV tools which must meet state standards.

When Providers choose to utilize their own EVV tools, the EVV data must meet state-mandated data requirements and data must be uploaded to the aggregator portal for integration with data collected by the State of Kansas EVV application.

- Caregivers will be expected to log into an EVV application to 1) validate that they have arrived, 2) document which services were administered, and 3) confirm when the care for each service concluded.
- Providers will confirm the EVV data and use it to generate Claims against State of Kansas Personal Care Services and Home Health Care Services.
- Managed Care Organizations will use the EVV data to confirm services and process claims for payments. This includes verification of Caregiver qualifications, delivery of services against the plan of care, and schedule of care.
- State Health Care workers will be able to use EVV data to audit and validate care provided as well as to support audit efforts to confirm caregivers have proper qualifications to perform the services being claimed.

## ***11. Electronic Records Retention Statement***

---

If any record retention requirements within KDHE or KDADS in place today are affected by this project, they will remain in their current state until formal/ proper approvals are received. This project may impact recordkeeping systems in place at KDHE and KDADS.

Record keeping and records retention consideration will be a required part of:

- All requirements Validation work,
- Product Designs and product build efforts.
- All Report Design and Build efforts

A complete records review is scheduled to be completed prior to the Build phase of the project to confirm the appropriate capture of new records. No destruction of records contrary to an existing policy will be allowed without formal retention schedule updates and law changes if appropriate.

### **Records Retention Plan Considerations:**

1. Identify replaced paper records
  - There will be no paper records replaced by the implementation of this project.
2. Identify new business functions
  - There will be no new business functions added for KDADS as a result of this project as KDADS already has an Electronic Visit Verification process in place.
  - KDHE will be adding a requirement for Caregivers to complete an activity for Electronic Visit Verification. The requirement will create a time-stamped and location verified record documenting and capturing the six specific elements of the EVV Solution data capture.
3. Reasons for business functions
  - The business functions are being added to help reduce fraudulent claims and improve the overall delivery of care to Medicaid Members by having Caregivers for Personal Care and Home Health Care services document their home visits and have their location confirmed by GPS satellite at the time care services are delivered.
4. Records requirements for a business function
  - The records required for the information and business function will fall into the existing schedule of records retention for all Medicaid claims information.
5. Documents in another system?
  - The documents/ EVV data content will be captured in the EVV system which will continue to be a Software as a Service Solution. The vendor providing the information related to the visit may also integrate with the KMMS system for a variety of applications including claims processing and Plan of Care updates.
6. Public access requirements
  - There may be a need for EVV information to be shared with Managed Care Organizations, Providers, Caregivers, Medicaid Members, and State of Kansas Health Care workers. As it includes protected health information, all access must comply with HIPPA regulations.
7. Access control requirements

## ***11. Electronic Records Retention Statement***

---

- EVV information includes protected health information, and all access must comply with HIPPA regulations. There will be robust access controls either using existing Rules Based Access controls in KMMS or through a controls system that protects the appropriate access.
- 8. Identify all records with a retention period of ten or more years
  - All EVV information will be held to the same standards of retention as Medicaid Claims information.
- 9. Estimate the three-year cost of addressing records identified in No. 8
  - Any additional costs for addressing the records with retention schedules of more than 10 years will be identified as part of the design process in the project. The task of updating Records Retention Policies and Requirements is listed in the project plan for February of 2022.

## 12. Project Risk Assessment

*A description of project risks, the probability of the risk occurring, the impact of the risk on the project, and the suggested mitigation activities.*

Last Risk Assessment Date: 10/15/2021

|---------------------------|-------------|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Financial</b>          | High        | Low        | Financial Risk: A gauge of the economic feasibility of the project. Without a clear financial need for the proposed system, there is a risk that management will not see the need for the project.<br>(3) Yes, Cost/benefits have been informally derived but not documented                                        | Requirement's validation phase to include analysis and quantification of benefits to further enhance the business economic justification.                                                                                                                  |
| <b>Project Management</b> | Med         | Med        | Project Management Risk: The level of management involvement in day-to-day activities. Issue tracking is important so that unresolved issues do not pose a threat to the success of the project.<br>(2) There is a method of issue tracking and resolution currently in place and is generally used by all parties. | KDHE/KDADS established a KPMO organization to implement proven project management disciplines that are in alignment with the State of Kansas PMM. Implement robust Risk, Issue, and Change Management plans.                                               |
| <b>Project Management</b> | Med         | Low        | The project contains more risk if the development sites are spread out in various locations.<br>(3) Development team members are in multiple locations but meet regularly.                                                                                                                                          | The current environment with the pandemic may necessitate project resources to be virtual or geographically dispersed. Established project reviews, meetings, and operating rhythm will ensure team members meet regularly and objectives are met.         |
| <b>Technical</b>          | High        | High       | Technology Risk: is there a plan for ensuring that deliverables meet the needs of end-users.<br>(3) The plan for ensuring user deliverables is in the conceptual phase.                                                                                                                                             | The biggest challenge is stakeholder engagement and defining the specific needs of each user group. A comprehensive change management and communications plan is being developed to reach out to and engage key stakeholders through a variety of channels |
| <b>Change Management</b>  | High        | High       | During the first six weeks of the project execution KDHE Team Members and MCOs will have KMMS Implementation as their first priority. This might cause EVV assignments to slip.                                                                                                                                     | Understanding the priority of KMMS and making adjustments as needed to continue to hit critical dates.                                                                                                                                                     |

### Legend

**Prob** = Probability of Occurrence (High: probable to occur, Medium: the reasonable probability of occurring, Low: not expected to occur)

**Imp** = Impact (High: significant risk to project cost/schedule/scope that requires adjustment and approval of project plan by leadership, Medium: moderate impact to project that can be mitigated by change management within cost/schedule/scope, Low: small impact and can be mitigated within project cost/schedule/scope)

**RISK ASSESSMENT MODEL**  
**High Level Plan - Summary Report**  
**Ver. 1.0**

**Agency Name:** KDHE & KDADS

**Project Name:** KDHE & KDADS Electronic Visit Verification (EVV)

### 1. Introduction

The Risk Assessment Model measures risk in distinct areas. Below are the average scores based on the results from the questionnaire. Each area indicates the measured risk on a scale from 1 to 9, with 9 being the highest risk. Scores lower than 2.0 are considered "Low Risk", scores higher than 2.0 are "Medium Risk" and scores higher than 3.0 are considered "High Risk".

### 2. Summary

| <u>Score</u> | <u>Risk Level</u> | <u>Risk Area</u>                     |
|--------------|-------------------|--------------------------------------|
| 1.0          | LOW               | Strategic Risk                       |
| 2.3          | MEDIUM            | Financial Risk                       |
| 2.4          | MEDIUM            | Project Management Risk              |
| 2.7          | MEDIUM            | Technology Risk                      |
| 1.0          | LOW               | Change Management / Operational Risk |

*Note: If you get "#VALUE!" as a result in any of the "Score" or "Risk Level" fields, you have unanswered questions. Go back and check your answers.*

### 3. Signature

I have reviewed the results of the Risk Assessment Model. The results are indicators only and do not represent all the risks of the project. ITEC will use the results as the basis of discussion, and will not rely solely on the output.
