

YOUR REPORTING POLICY IS A TARGET.

For optimum protection against hackers, people must learn about security incidents in a complete, accurate and timely manner. Hackers expect that incident news will not be reported. Sharing this information is good for everyone and exposes the activities of hackers. Understanding hacker methods helps experts to combat them.

Our security awareness program will bring you up-to-speed on important cyber security topics through engaging training modules and simulations. In the coming weeks and months, you'll learn how to spot phishing attempts and other cyber threats before they occur, helping keep your organization's sensitive information safe.

SHARING INCIDENT INFORMATION: BEST PRACTICES

Follow all reporting
policies and procedures

Learn to use the Phishing
Alert button on your email

Document all relevant
facts about the incident
